

THE FACTS ABOUT THE RISKS YOU FACE

Man, your chance that any of these could happen before your retirement age of 67 is:

42%

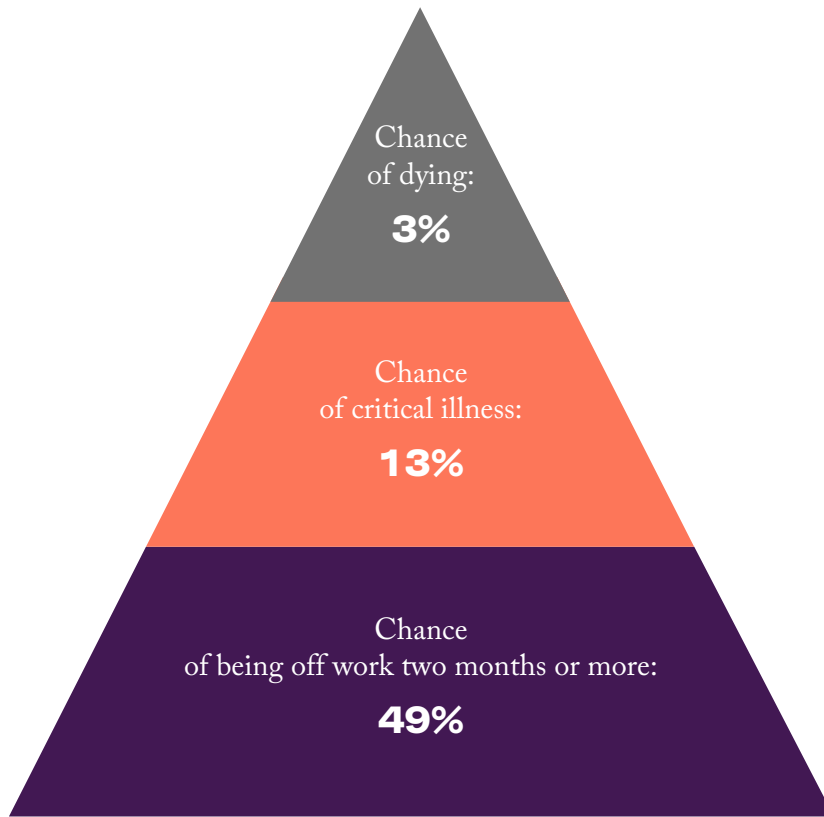

This is based on your age, gender and whether you smoke. Life insurance is more popular than critical illness cover or income protection – but there's a much bigger chance of being diagnosed with a critical illness and/or facing a long-term absence from work.

To find the best way to protect you and your family, talk to us today.
